

HPE Aruba Networking 9200 Series Campus Gateways QuickSpecs

Enterprise-Class Wi-Fi Performance and Reliability at Scale

The HPE Aruba Networking 9200 Series Campus Gateway delivers enhanced Wi-Fi scalability and security to meet demands at the Edge. Engineered for mission-critical environments, this series delivers high performance, seamless roaming, 24x7 reliability, and always-on connectivity – even during upgrades. The HPE Aruba Networking 9200 Series Campus Gateway provides consistent policy enforcement across wired and wireless and dynamic segmentation for any user or device – even IoT.

Overview

HPE Aruba Networking 9200 Series Campus Gateways

Standard Features

Enterprise-Class Performance

For medium and large enterprises who require high performance and 24x7 reliability, the HPE Aruba Networking 9200 Series is designed to scale to meet today's and future demands. This gateway builds upon HPE Aruba Networking legacy 7200 Series Gateways to provide next-generation connectivity for up to 2,048 Aps and 32,000 devices.

To ensure high availability, the gateway supports live upgrades and multiple gateways can be clustered together at each location for business continuity. Zero touch provisioning eliminates the need for on-site IT support.

Investment Protection

The HPE Aruba Networking 9200 Series Campus Gateway removes the need for overprovisioning or frequent hardware refreshes with software upgrade licenses that unlock additional capacity with no hardware refresh required. Enterprises can opt for hardware only (20 Gbps total throughput, 512 Aps/16K devices) or for greater capacity they can add silver perpetual licenses (30 Gbps total throughput, 1K Aps/24K devices) or gold perpetual licenses (40 Gbps total throughput, 2K Aps/32K devices).

Flexible Consumption

HPE Aruba Networking 9200 Series Campus Gateway supports WLAN and SD-WAN deployments with a choice of HPE Aruba Networking Central subscription licenses. GreenLake for Networking can help with the transition to a subscription-based network consumption model.

Powerful Security Enforcement

HPE Aruba Networking 9200 Series Campus Gateway delivers consistent policy enforcement across wired and wireless via dynamic segmentation. Traffic is tunneled to the gateway where granular rules are applied for any user, location, application, or device type – including IoT. For example, traffic can be segmented based on a defined set of user types such as guest, contractor, or employee to provide greater levels of security.

To deliver unified policy enforcement, these gateways rely on a built-in Layer 4-7 stateful firewall known as the policy enforcement firewall (PEF). It streamlines policy management by working across WLAN, LAN, and WAN. When deployed alongside HPE Aruba Networking ClearPass Policy Manager, policies are automatically enforced to simplify SSID, VLAN, and policy management.

Standard Features

Advanced Capabilities

Seamless Roaming

Users often experience delays and application disconnects when they move from one subnet to another, for example on a large campus. This is caused by the designation of a single subnet per building, which restricts the roaming domain to a specific building. When roaming across buildings, application persistence is lost and new sign on is required. The HPE Aruba Networking 9200 Series Campus supports tunneling so that two disparate networks can connect directly to one another, bypassing normal routing rules and allowing a station to maintain the same Layer 3 address when roaming throughout a multi-VLAN network to improve the mobile user experience.

Quality of Service

Deep Packet Inspection provides greater application visibility and control. As a part of the policy enforcement firewall, the gateway consistently evaluates and optimizes performance and usage policies for over 3,000 applications. This ensures the highest possible Quality of Service (QoS) – even for encrypted traffic.

Redundancy and Clustering

HPE Aruba Networking 9000 Series can be deployed with N+1 or NxN redundancy and can also join a controller cluster when deployed as a mobility controller managed by Mobility Conductor. This increases performance and scale for enhanced resiliency.

Simple to use, mobile provisioning

Allows on-site personnel to use a mobile app to onboard gateways. A central IT team can verify device location, licenses, and status with no additional steps required.

Unified Communications and Collaboration (UCC)

Visualize and troubleshoot networks based on call quality metrics such as MOS, latency, jitter, and packet loss. Supported applications include Teams, Zoom, Skype, Wi-Fi Calling, FaceTime, SIP, Jabber, Spark, and more.

IoT and Integration Ready

To support IoT and integrate with your existing infrastructure, HPE Aruba Networking 9200 Series offers integrated device profiling. This improves client visibility and works with HPE Aruba Networking ClearPass Policy Manager to provide advanced user, device, and IoT policy management and insights.

Interfaces and Indicators

Form Factor	1 RU
Interface	4x SFP28
Out of Band Management Port	1x RJ45
Console port	USB-C, RJ45
USB 3.0 Type-A	2
LCD Display	1
Power LED	Yes
Status LED	Yes
Peered LED (Reserved for Future Use)	Yes
Expansion Slot (Reserved for Future Use)	1
Power Supply Slots	1 + Redundant
Fan Trays	5

Physical

Dimensions (HxWxD)	1.73" x 17.40" x 15.60" (4.4 cm x 44.2cm x 39.6 cm)
Weight	18.08 lbs (8.2 kg)
MTBF (Hours at 25C with Fans and PSU)	185,301

Environmentals

Operating Temperature	0 °C to 40 °C (32 °F to 104 °F)
Storage Temperature	-40 °C to 70 °C (-40 °F to 158 °F)
Humidity/Storage Humidity	10% to 90% (RH)/10% to 95% (RH), non-condensing
Operating Altitude	10,000 feet
Acoustic Noise ¹	65.2 dBA (Typ)
Maximum Heat Dissipation (BTU/hour)	648 BTU/hr
Maximum Power Consumption	190W
Power Source	550-watt power supply

Notes: ¹Sound power per ETSI 300 753 in accordance with ISO 7779

Technical Specifications

Power Supply Certifications	
Input voltage range	100 VAC to 240 VAC
Output Voltage	12V
Input frequency	50-60 Hz
AC line input current (steady state)	7.1A
Operating Temperature	0° C to 55° C
Cooling	Internal fan (Air flow rear to front)
Weight	0.8Kg

Service and Warranty Information

Hardware

1-year parts/ labor, can be extended with support contract

Mobility Controller Software

90 days, can be extended with support contract

Summary of Changes
